San Francisco, Aug 26th 1883

Dear Dr. Gray:

I have just received from London a copy of Tulasne's *Fungi Hypogaei*, and I therefore hasten to return yours with many and grateful Thanks for the loan. I forward to day by express and trust you will receive it in good order.

The weather here being cold and foggy I am just departing for the mountains in search of sunshine and such stray species of fungi as may present themselves.

Present my kind compliments to Mrs. Gray and believe me to be dear doctor,

Yours sincerely,

A. W. Arckness

Harbress Hw
